## **DETAILED ACTION**

Page 2

• Claims 7-47 are restricted.

• Claims 1-6 are presented for examination.

## Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Collaborative Gaming in Augmented Reality by Zsolt et al (hereinafter "Zsolt").

As per claim 1, Zsolt teaches an internetworked augmented reality (AR) system (fig. 1), comprising:

- a. At least one Local AR Station, manned by a local user who is viewing a local real-world scene (see fig. 1 player's client);
- b. At least one Remote Station, at least one of which is an AR Station manned by a

Application/Control Number: 09/776,133

Art Unit: 2153

remote user who is viewing a remote real-world scene see fig. 1 player's client and page 196, section 3.2);

Page 3

- c. A network connecting these stations (see fig. 1);
- d. Computer equipment for presenting to the local user a virtual representation of the remote user overlaid on the local real-world scene (see fig. 1 and section 4);
- e. Computer equipment for presenting to the remote user a virtual representation of the local user overlaid on the remote real-world scene (see fig. 1 and section 4 and 5.1); and
- f. Computer equipment that allows for collaboration between the local and remote users over the network, the collaboration comprising at least one of the users providing feedback to another user (see fig. 1 and section 4.1 and 4.2).

As per claim 2, Zsolt teaches the system of claim 1 wherein an AR Station is comprised of at least:

a. A computing system; An AR display system, and A tracking system (see fig. 1 and section 3.2)

As per claim 3, Zsolt teaches the system of claim 1 wherein a Non-AR Station is comprised of at least: a. A computing system (fig. 1)

As per claim 4, Zsolt teaches the system of claim 1 wherein the network is selected from the group of networks consisting of a local area network (LAN), a wide area network (WAN), a wireless network, and the Internet (fig. 1).

Art Unit: 2153

As per claim 5, Zsolt teaches the system of claim 3 wherein a Non-AR Station computing system is selected from the group of computing systems consisting of a PC, web server, database server, and high-performance computer (HPC) (see gaming server in fig. 1).

As per claim 6, Zsolt teaches the system of claim 3 wherein there is equipment allowing a human to use at least one Station in addition to the required Local AR Station (see fig. 1 and section 3.2 and 5.1)

## Conclusion

The prior made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yasin Barqadle whose telephone number is 571-272-3947. The examiner can normally be reached on 9:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Burgess can be reached on 571-272-3949. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.

Information regarding the status of an application may be obtained form the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either private PAIR or public PAIR system. Status information for unpublished applications is available through private PAIR only. For more information about the
